

Origami 5: Fifth International Meeting of Origami Science, Mathematics, and Education

Origami5 continues in the excellent tradition of its four previous incarnations, documenting work presented at an extraordinary series of meetings that explored the connections between origami, mathematics, science, technology, education, and other academic fields. The fifth such meeting, 5OSME (July 13-17, 2010, Singapore Management University) followed the precedent previous meetings to explore the interdisciplinary connections between origami and the real world. This book begins with a section on origami history, art, and design. It is followed by sections on origami in education and origami science, engineering, and technology, and culminates with a section on origami mathematics—the pairing that inspired the original meeting. Within this one volume, you will find a broad selection of historical information, artists' descriptions of their processes, various perspectives and approaches to the use of origami in education, mathematical tools for origami design, applications of folding in engineering and technology, as well as original and cutting-edge research on the mathematical underpinnings of origami.

Second International Meeting of Origami Science and Scientific Origami, International Conference on Origami in Science, Mathematics, and Education (4OSME), The fifth meeting was organized by Patsy Wang-Iverson, Eileen Tan, and Its proceedings, Origami, was co-edited by Patsy Wang-Iverson, myself, and Origami 5 : Fifth International Meeting of Origami Science, Mathematics, and Education. Responsibility: edited by Patsy Wang-Iverson, Robert J. Lang, Mark Yim. Fifth International Meeting of Origami Science, Mathematics, and Education Origami5 continues in the excellent tradition of its four previous incarnations, Origami 5 Fifth International Meeting of Origami Science, Mathematics, and Education.
